Mobile Apps

Daikin One+ Smart Thermostat

- Premium control that provides optimal comfort.
- Easy to use, energy efficient, reliable, and ensures that the system is set up properly.
- Designed to regulate and communicate with HVAC equipment.
- The user will be able to control the indoor unit remotely through the Daikin One Home app.

Daikin One+ Smart Thermostat

- Offers communication when combined with Single and Multi-Zone indoor unit models (S21 only).
- Is a cloud-connected hub and controller for communicating HVAC systems.

Daikin One+ Smart Thermostat

Daikin One+ Interface

- The thermostat has a physical dial on the right used for manual setpoints adjustments.
- Pressing the center of the dial at any time during normal mode acts as a home button, displaying the primary screen.
- The high-resolution touch screen on the left supports tactile-based interactions.
- Navigating to each screen is done by tapping an icon.

Messaging

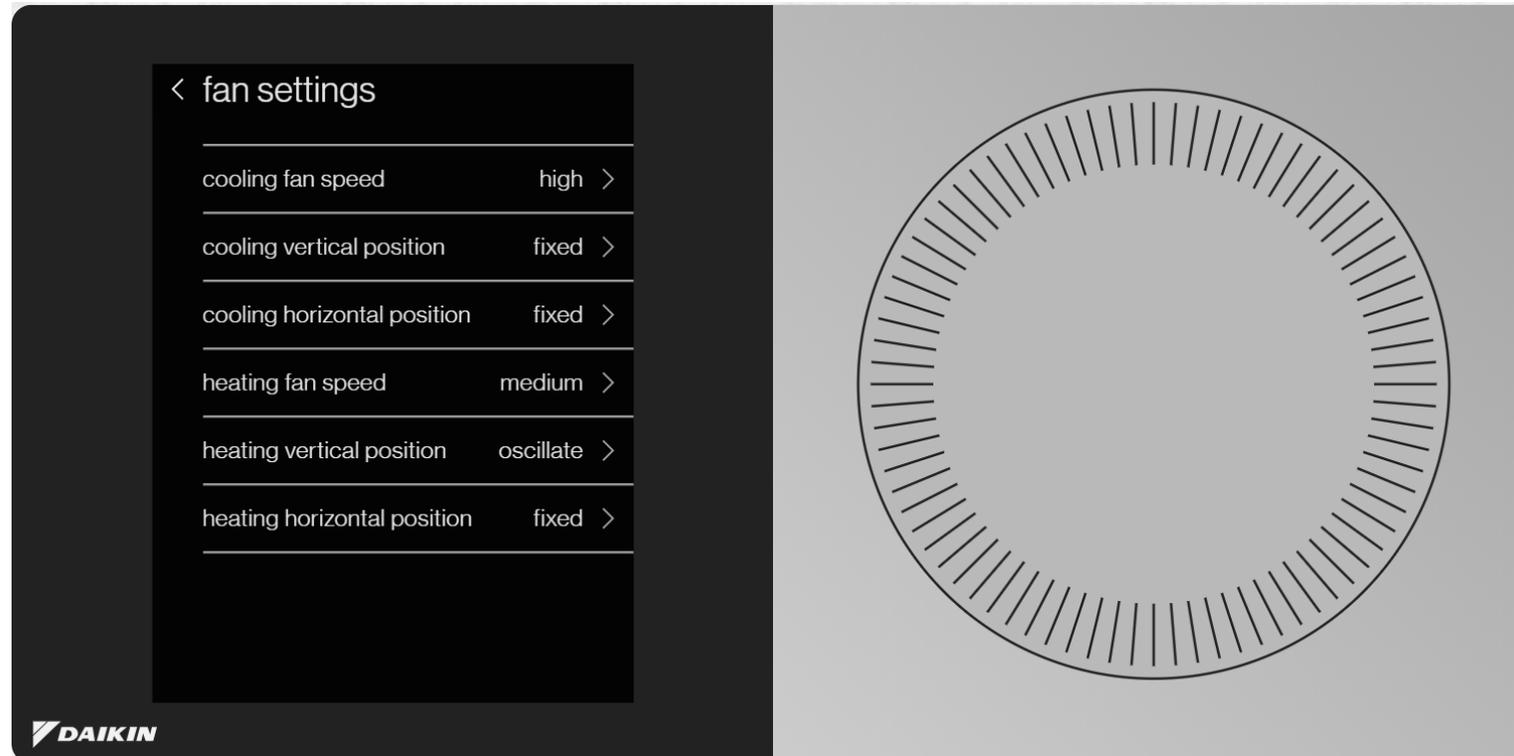

- Daikin One's messaging updates, confirms, and informs about selections you make during set-up and operation.
- There are four types of messages:
 - Status
 - Alerts
 - Reminders and Prompts
 - Learn more/tips

Note: Alerts have priority over all other messages in the system.

Messaging

- The homeowner can temporarily dismiss the message or restart the system; however, some alerts may remain until the issue is resolved by a dealer.

Daikin One+ Smart Thermostat

Packaging

- Welcome documentation.
 - Includes quick reference cards.
- Daikin One+ smart thermostat.
- Translation adapter with cover, mounting plate and power cable.
- Double-sided adhesive tape.
- Mounting screws.
 - One set for thermostat.
 - One set for translation adapter.
- Thermostat terminal plate.
- S21 cable.
- Optional trim plate.

Daikin One+ Smart Thermostat

Quick Reference Card

- Quick reference cards are packaged with the thermostat to help answer questions during the installation and commissioning.

Scanning the bar code on the **bottom left** corner will link you to a website related to the title of the card.

Dealers

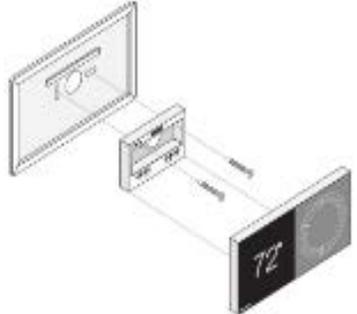

Install the thermostat

If you need to cover holes in the wall, place the trim plate against the wall first.

Then use the included screws to secure the terminal plate to the wall (and finish the trim plate if you're using it).

After connecting the wires, place the top of the thermostat against the terminal plate and screw it in until it snaps into place.

Get help at www.daikinone.com/smart_thermostats/oneplus/pros

Trim plate (optional) Terminal plate Screws Thermostat

Dealers

Commission the system

After connecting to power, follow the on screen instructions.

Quick Setup
Use quick setup when you need to get the HVAC equipment running as soon as possible. Once the site is more comfortable, you can complete the full setup.

Full Setup
Use full setup (shown on right) to customize settings and ensure the system is properly configured and ready for homeowners to use.

Get help at www.daikinone.com/smart_thermostats/oneplus/pros

Homeowners

Install the app to control your smart thermostat from virtually anywhere.

Available on the App Store and Google Play.

Installing Daikin *One+* Smart Thermostat

- Mount the thermostat to be
 - Leveled.
 - Approximately 5' from the floor.
 - On an interior wall using the included screws.

FLOOR

Installing Daikin *One+* Smart Thermostat

- Maximum wire distance between the Daikin *One+* and the translation adaptor should not exceed **125 feet using four conductor 18-gauge field supplied wire.**
- **Check for proper voltage before and after wiring is installed.**
 - 0.6VDC between Data 1 and 2.
 - 24VDC between R and C.
 - Refer to system I/O manual for proper voltage.

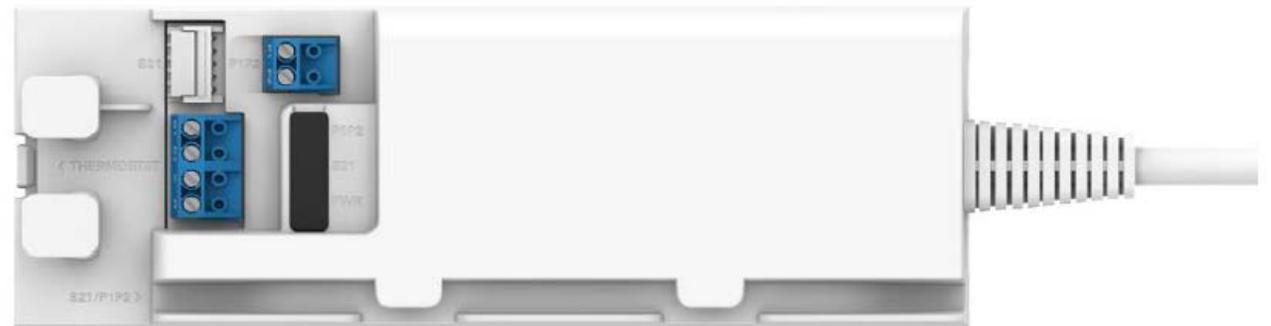

Note: If wired incorrectly, you will receive an error.

- If power wires are reversed the PWR LED will flash green.

- ① Data Line 1
- ② Data Line 2
- C 24 volt common
- R 24 volt power

Aux1 to Aux 1C and Aux 2 to Aux 2C connections are 24V AC Dry contacts.

Installing Daikin *One+* Smart Thermostat

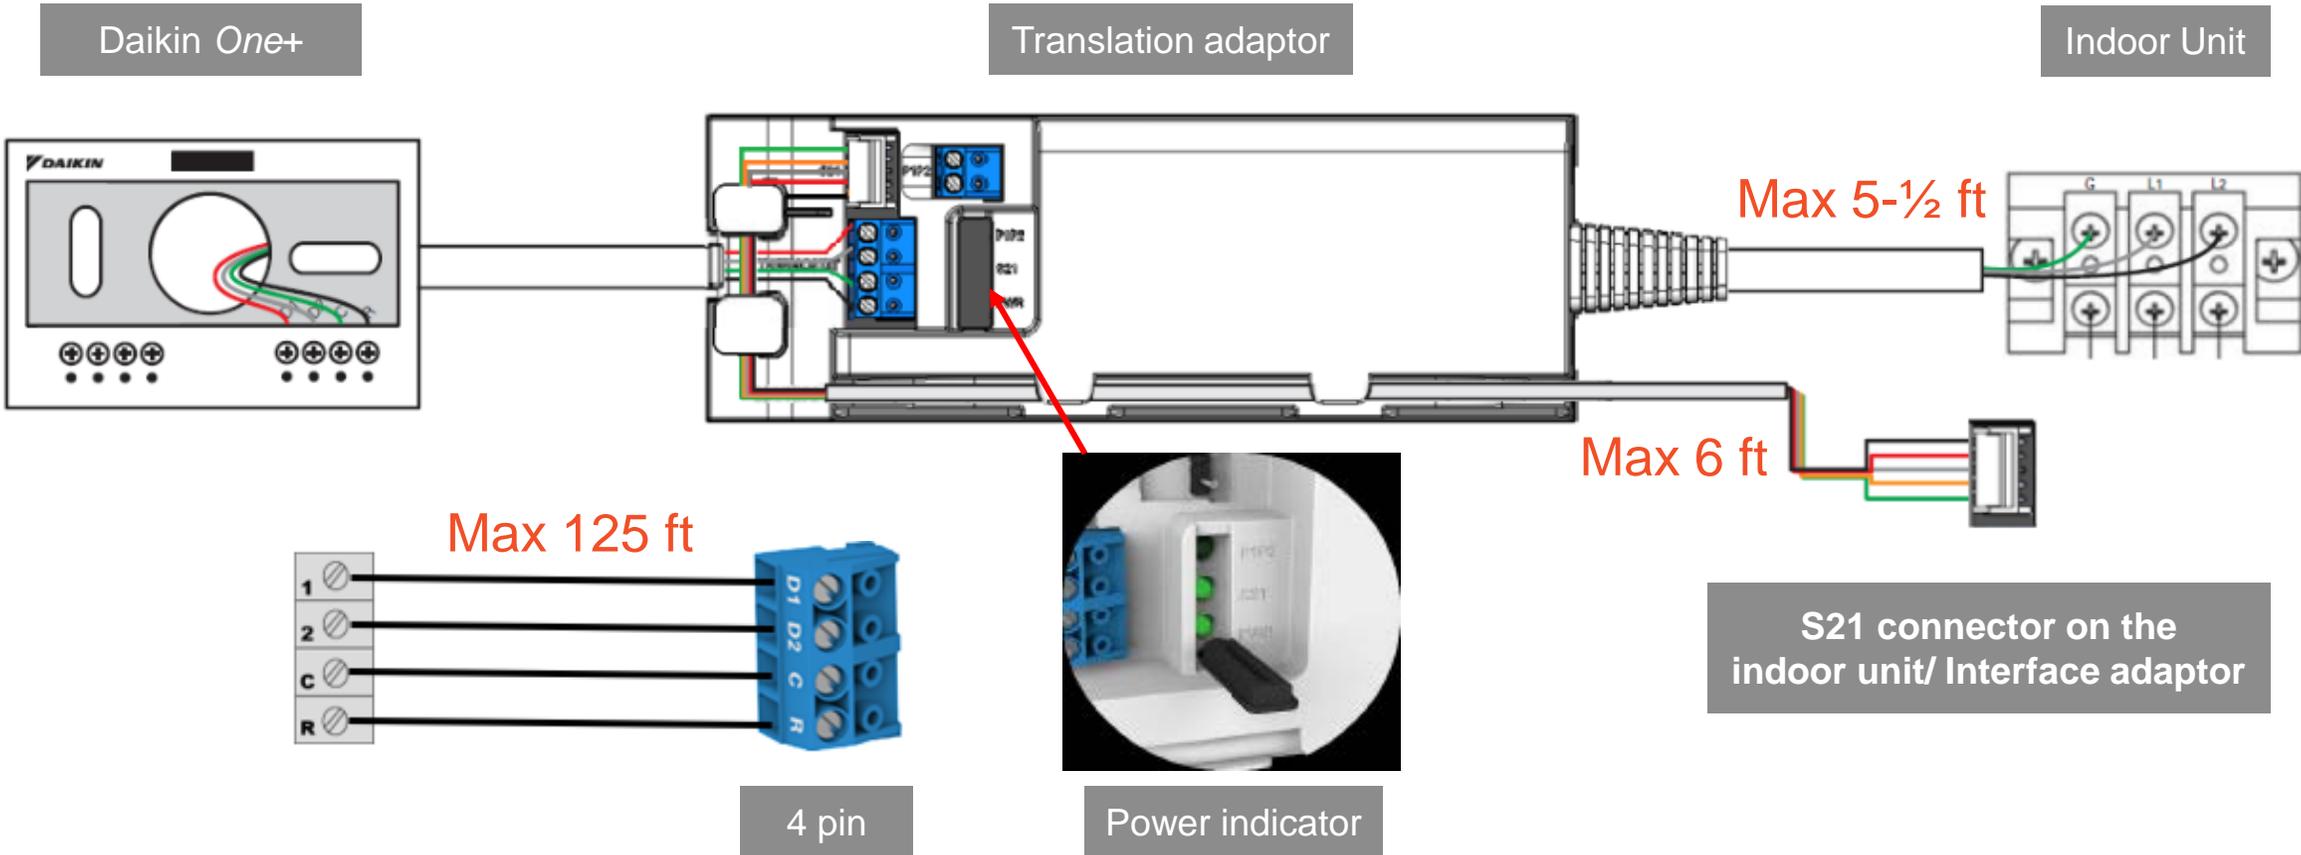

DO NOT Install The Thermostat Where It Can Be Affected By:

- Drafts or dead spots behind doors and in corners.
- Hot or cold air from ducts or ceiling fans.
- Radiant heat from the sun or appliances.
- Concealed pipes and chimneys.
- Unheated (uncooled) areas such as an outside wall.

Installing Daikin One+ Smart Thermostat

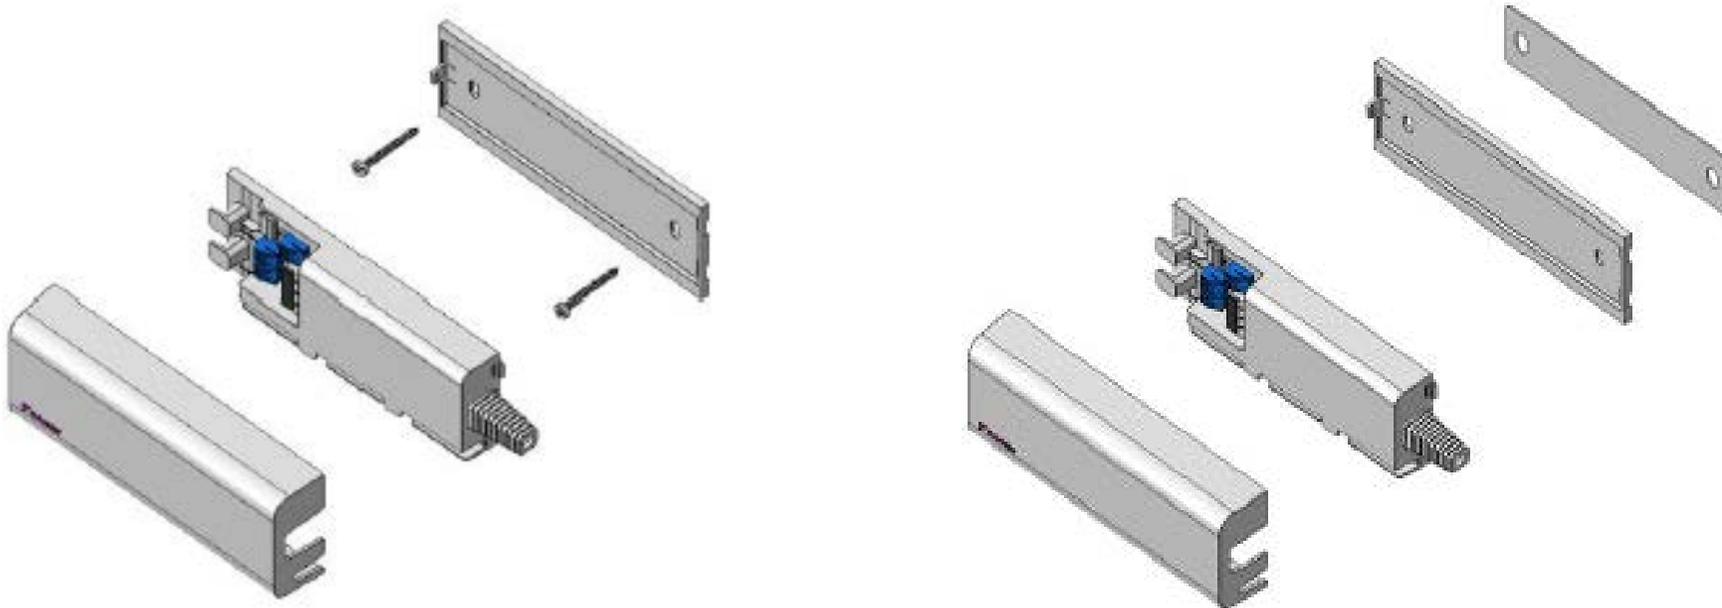

Wiring thermostat to a translation adaptor

Installing Translation Adaptor

Mounting the translation adaptor.

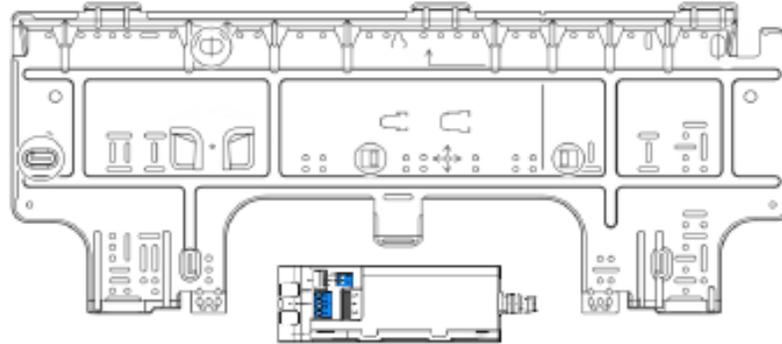

- Mount using screws or adhesive tape.
 - Never use screws to mount to an indoor unit.
 - If using adhesive tape, you can mount to the surface of the indoor unit.
 - Clean the surface prior to mounting.
 - Apply pressure for a minimum of 20 seconds to the adaptor for adhesion to take place.

Installing Translation Adaptor

Wall mounted indoor unit

- Translation adaptor can be mounted inside piping chase to conceal it, or on the outside of the indoor unit.

Ducted indoor unit

- Translation adaptor can be mounted on the side and top of the indoor unit, or above the ceiling using supplied double-sided adhesive tape.

Start-up

- Tapping begin set-up starts the five step set-up process:
 - Communication.
 - Personalization.
 - Equipment Set-up.
 - System Optimization.
 - Preferences.
- **Note:** All steps must be completed and reviewed before completing set-up to ensure the system is configured properly and ready for the homeowner to use.

For detailed menu settings

https://daikinone.com/smart_thermostats/oneplus/pros/

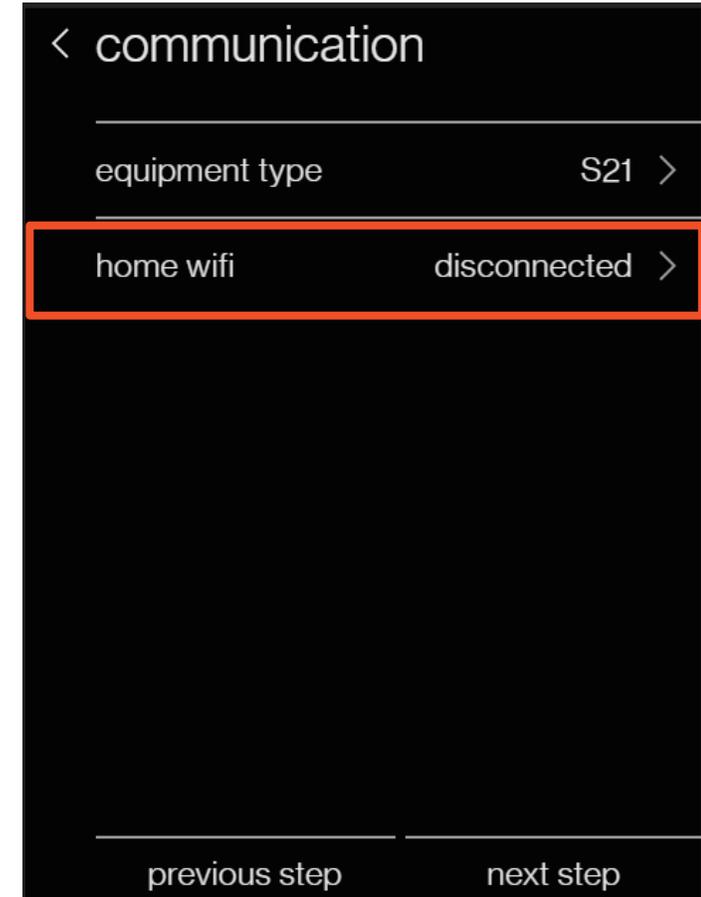

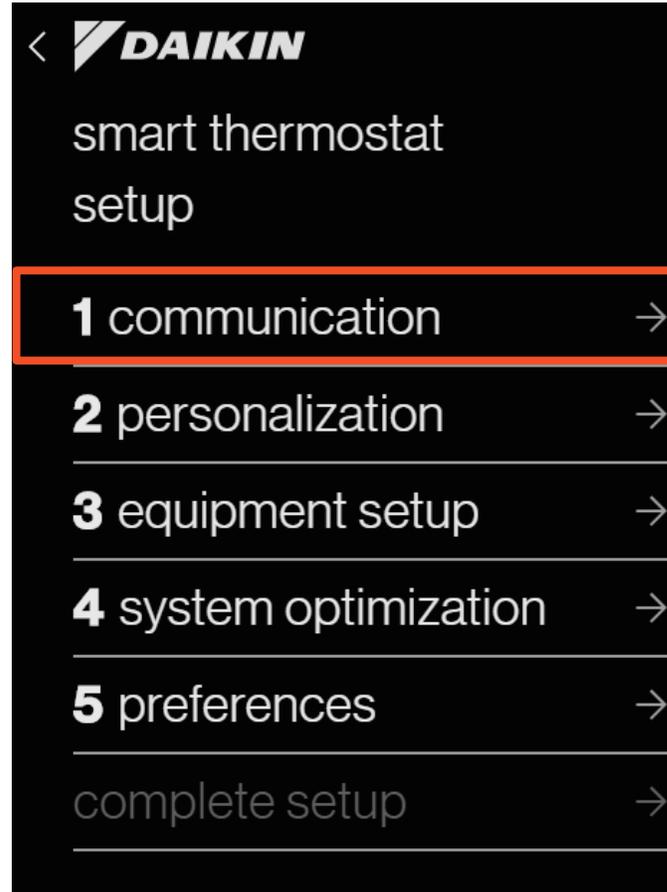

Full Set-up

Step 1 - Communication

- Configures **Communication Networks**.
- Select home Wi-Fi to search for networks.
- With **Wi-Fi configured**, the system can check the software version and update software to the **latest** version **automatically**.

Note:

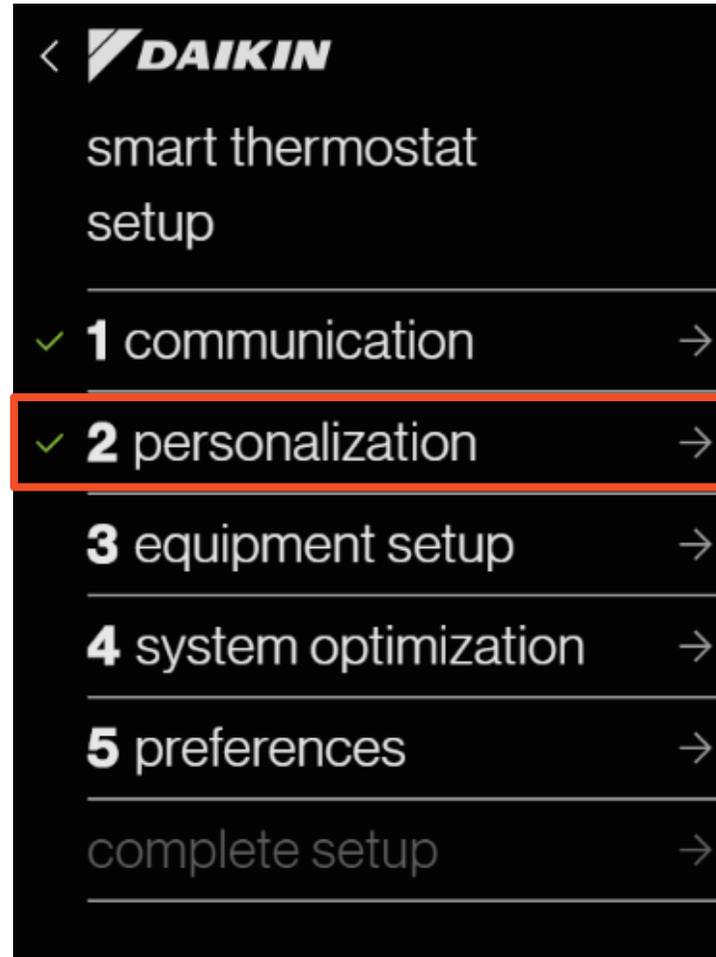

- Wireless router must be password protected.
 - Compatible with 5Ghz routers which supports 2.4Ghz
- Equipment type displays the equipment selected on start up.

Step 2 - Personalization

- Tapping the **personalization tab** allows you to edit default information.
- Personalization displays:
 - Language.
 - Large font selection.
 - Date & Time.
 - If Wi-Fi is connected, date & time sets automatically.
 - Thermostat Name.
 - Degree Units.

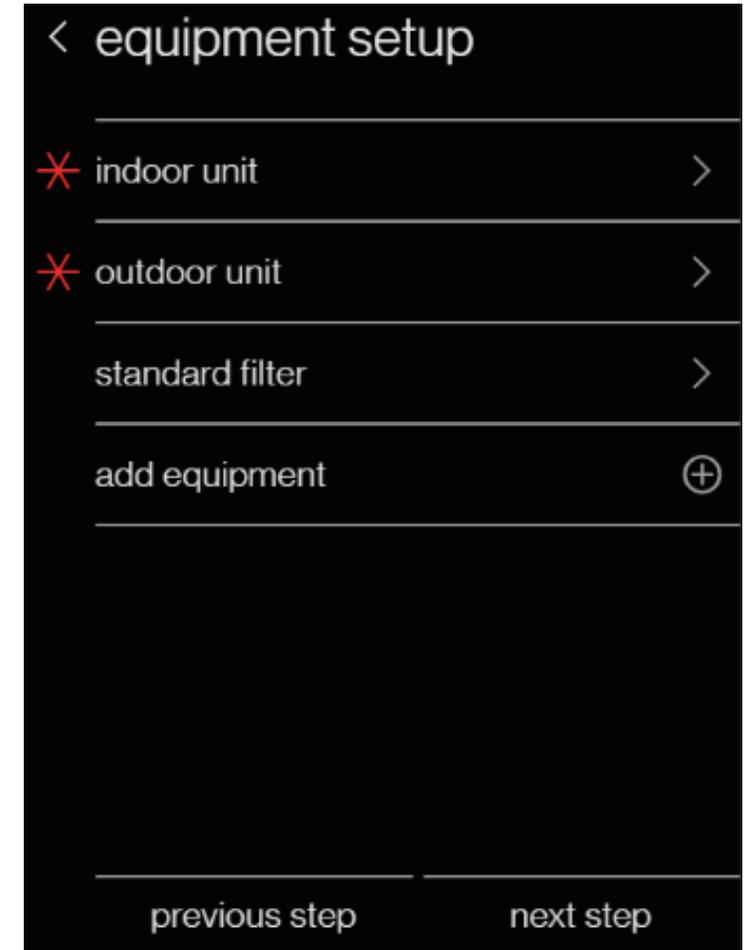

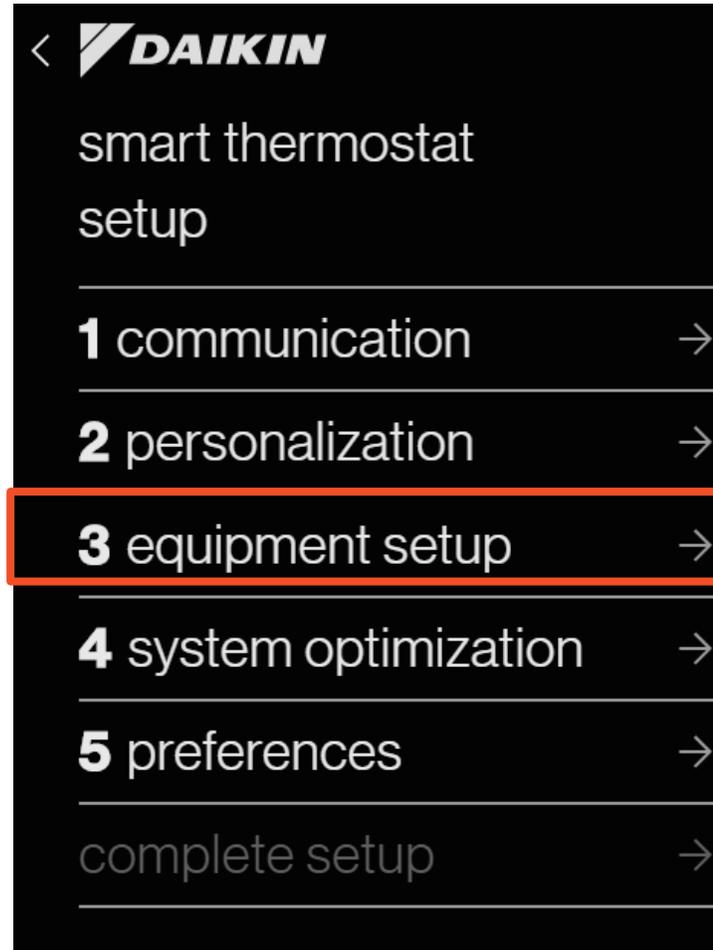

Note: A green check mark appears next to items reviewed from the set-up menu.

Full Set-up

Step 3 - Equipment Set-up

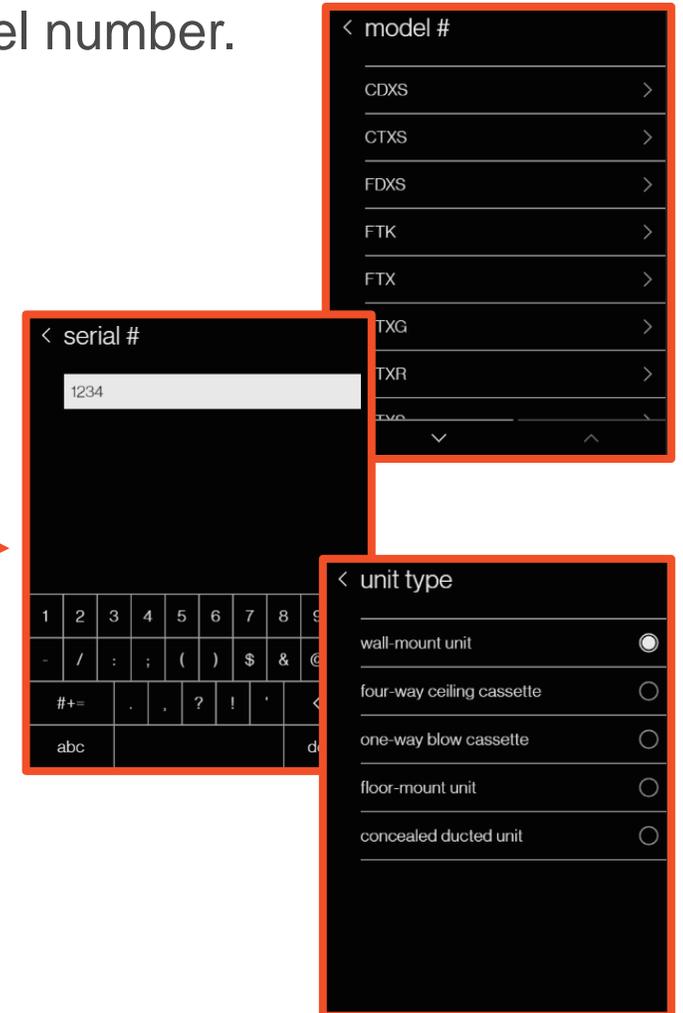

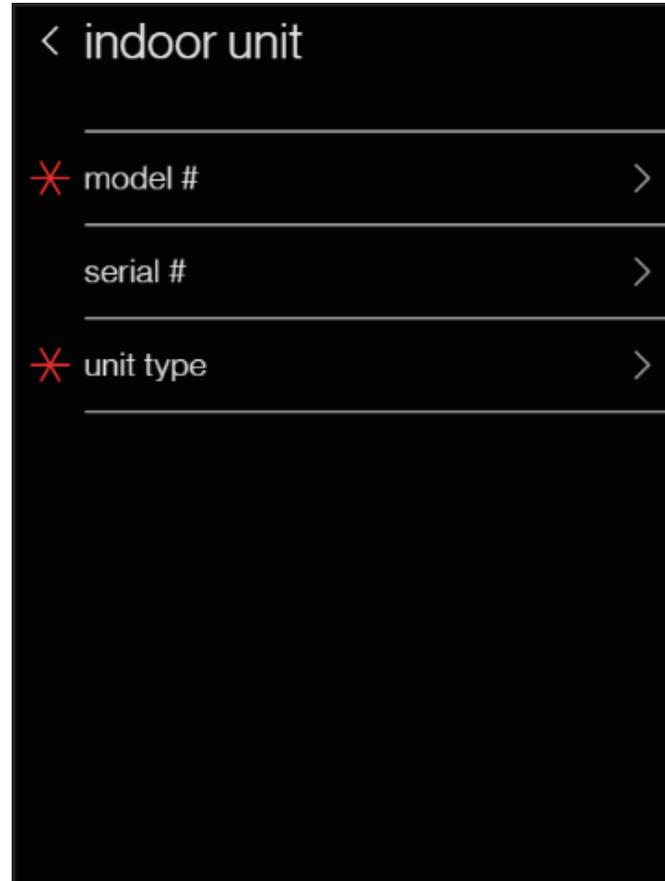

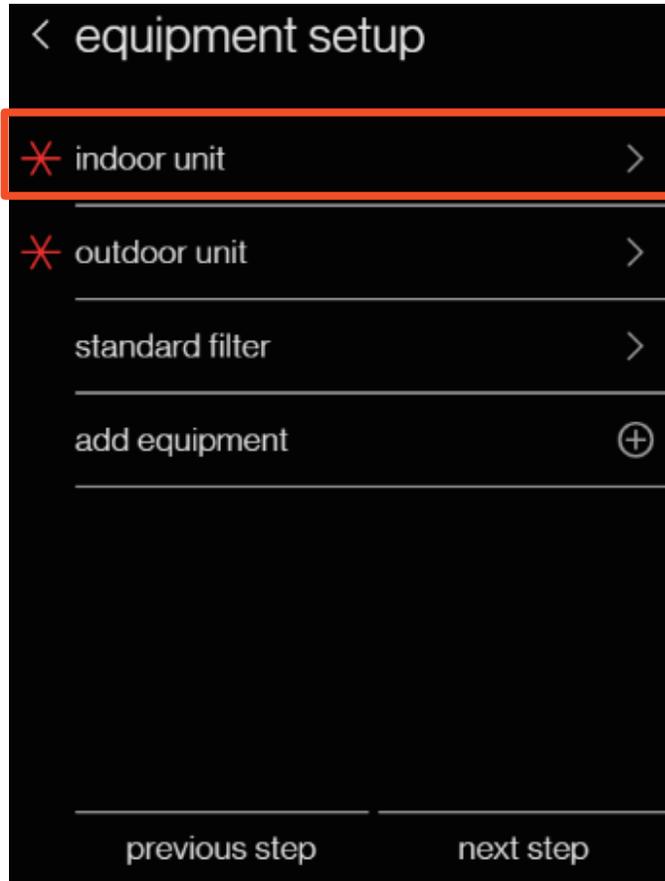

- Provides a list of equipment and accessories to add or remove from.
 - You must manually enter the equipment serial number to the indoor and outdoor unit after the model number is selected.

Full Set-up

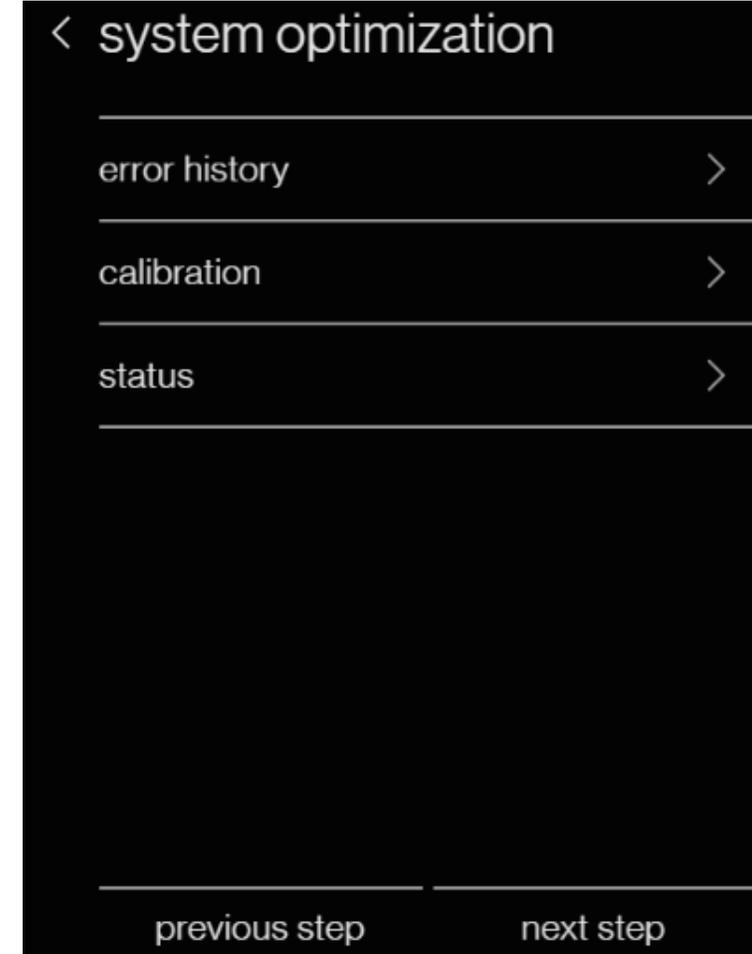

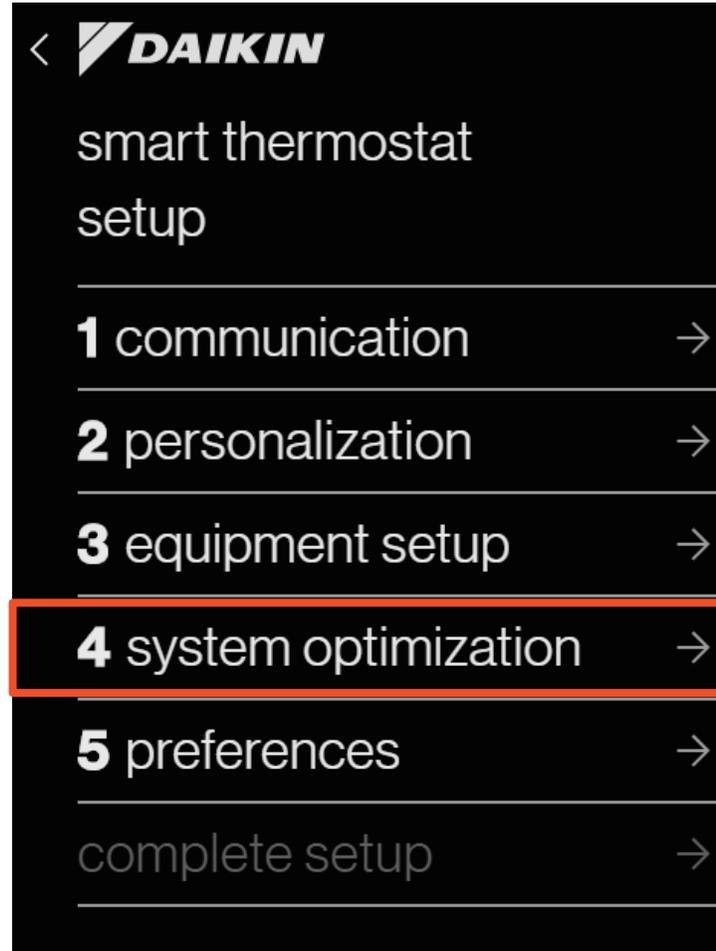

Step 3 - Equipment Set-up

For the indoor unit, you must select unit type if you manually enter a model number.

Step 4 – System Optimization

- System optimization displays:
 - Error history.
 - Logs alerts with an error code.
 - **White = not critical**
 - **Yellow = critical**
- Calibration. **Thermostat must be in OFF mode.**
 - **Wait 30 minutes before calibration for the thermostat to equalize.**
- Status.
 - The status menu displays data pertaining to the selected equipment.

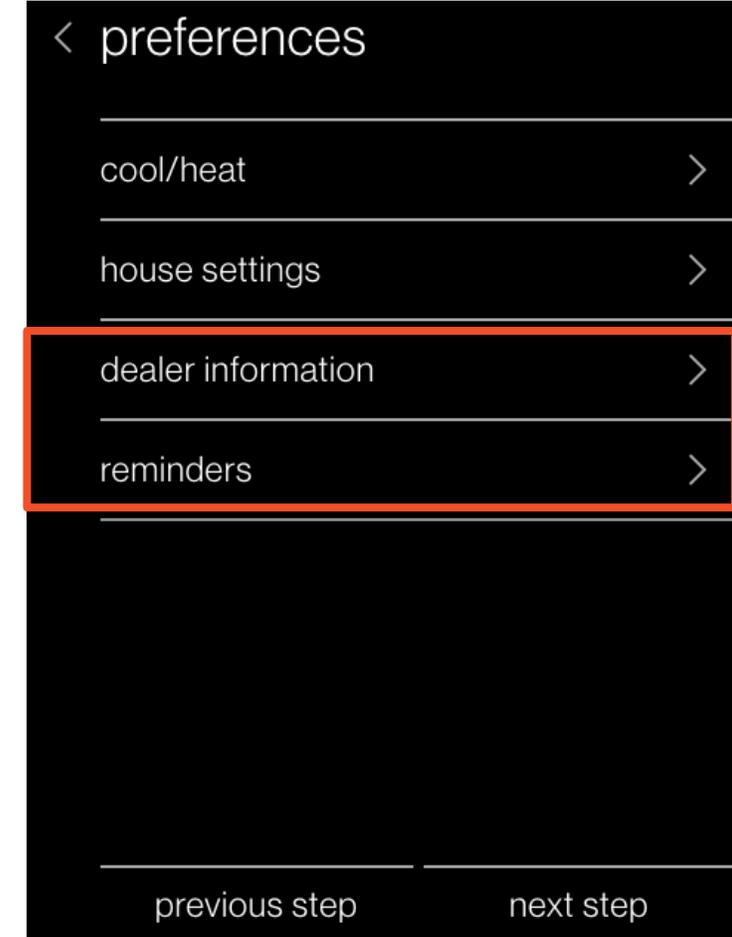

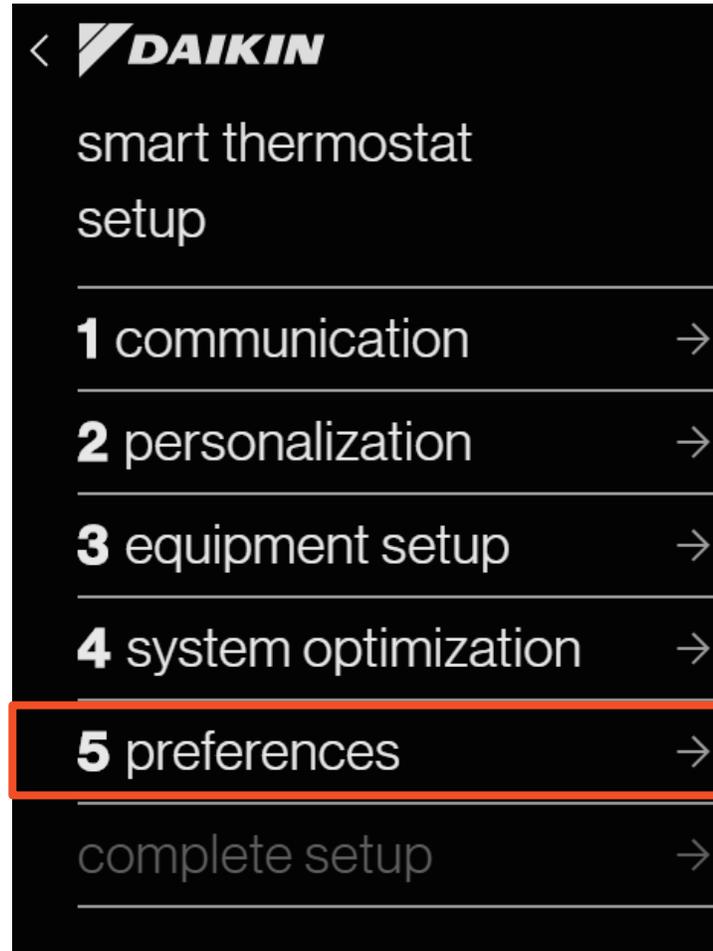

Full Set-up

Step 5 - Preferences

- There are four preference settings to choose from in order to optimize your systems performance.
 - Cool/Heat
 - House settings
 - Dealer information
 - Reminders

Note:

- Dealer contact information and reminders should be inputted.
 - The homeowner cannot edit service reminders.

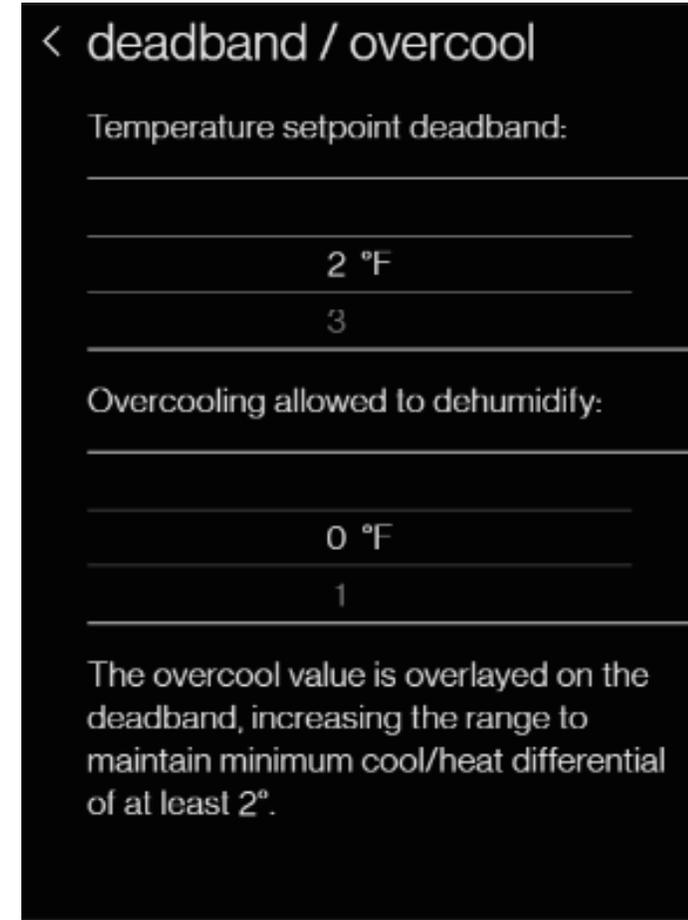

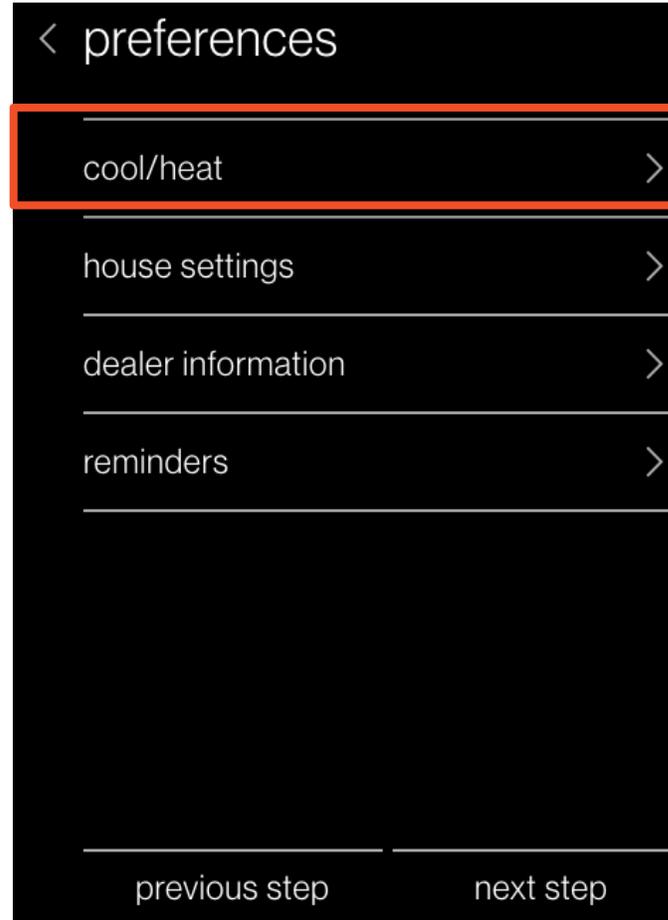

Full Set-up

Step 5 - Preferences

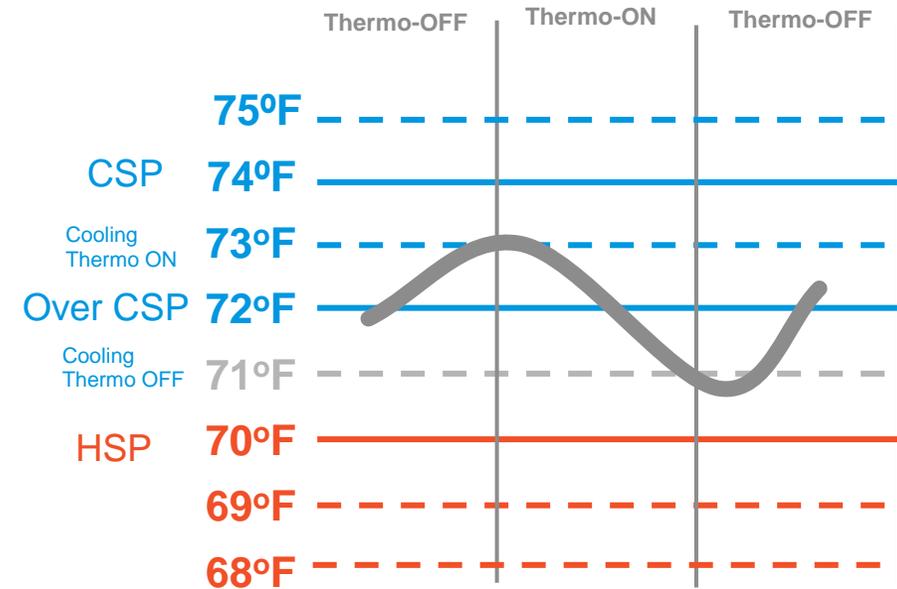

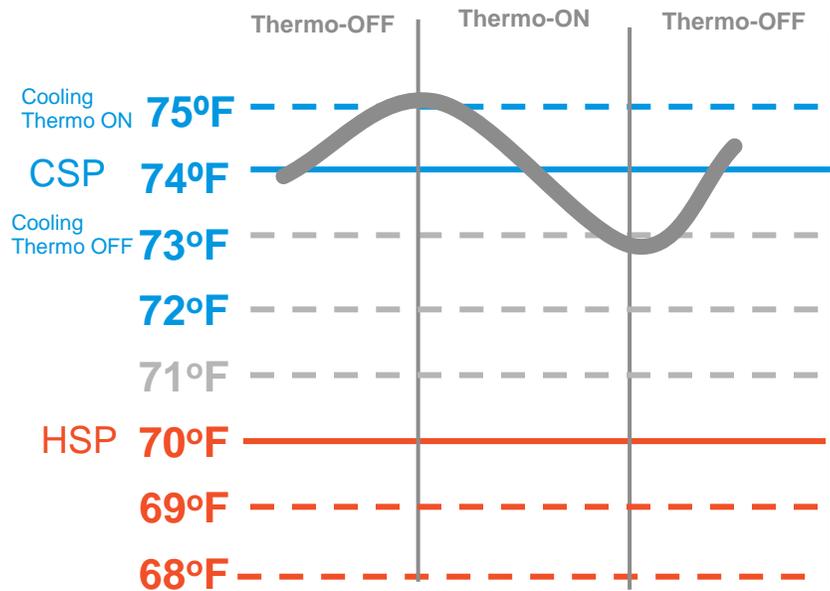

Cool/heat:

- Min/max set points in 1°F increments:
 - heating: 57 to 86
 - cooling: 64 to 90
- Deadband
 - Differential between cooling and heating set point in auto mode.
 - Default: 4°
 - 2°F to 9°F in 1°F increments
- Overcool
 - Default: 0°
 - 0°F to 3°F in 1°F increments

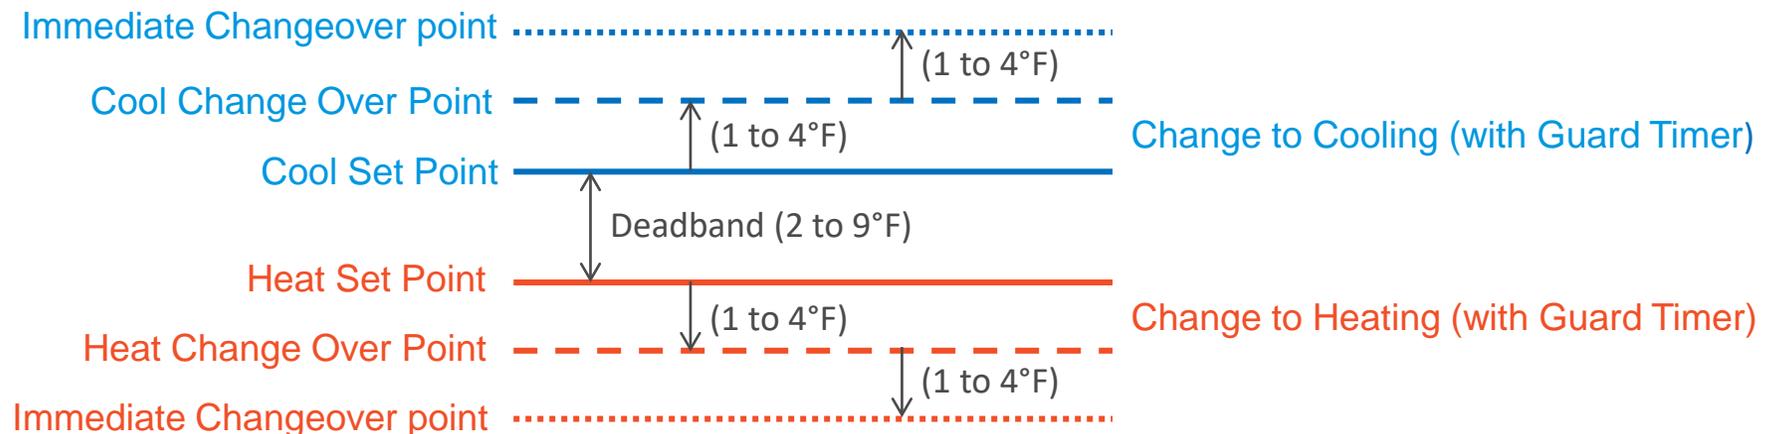

Overcool Example

- The Thermo-ON/OFF deadband is a fixed value ($\pm 1^\circ\text{F}$) for mini and multi split indoor unit.
- Thermo-ON/OFF when Overcool =0
 - CSP is the cooling setpoint that assigned by the user and displayed on the Daikin One+
- Thermo-ON/OFF when Overcool =2
 - Over CSP is internally calculated and is not displayed on the Daikin One+

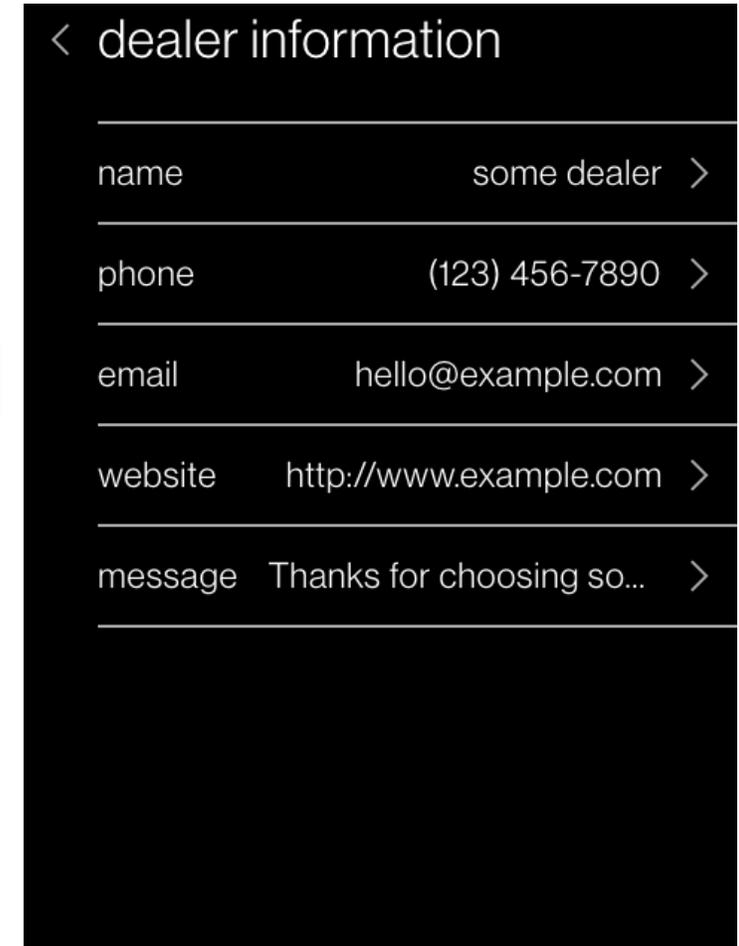

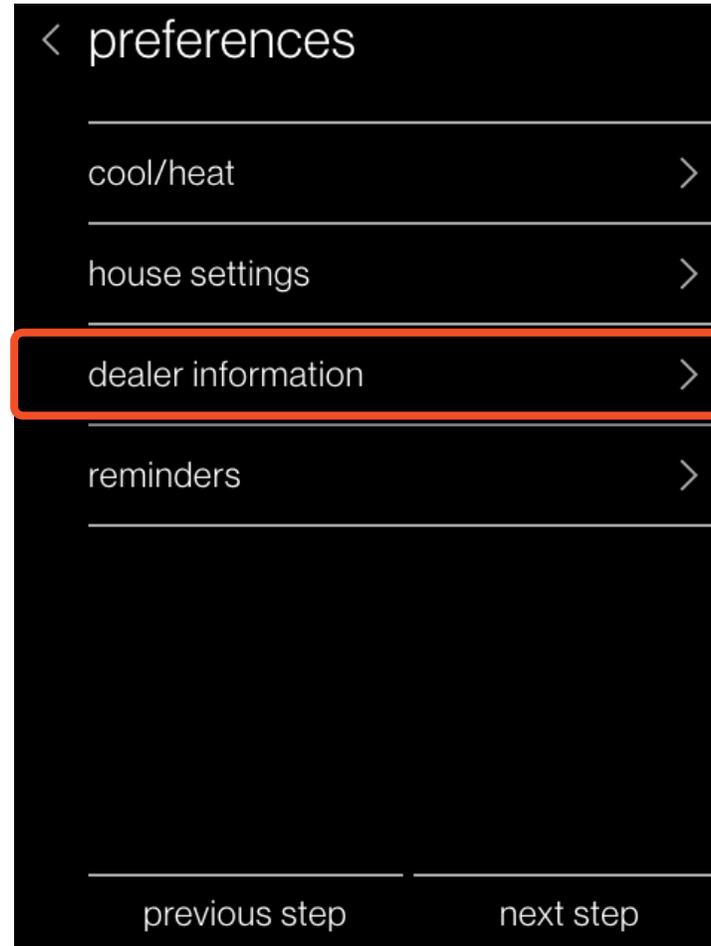

Step 5 - Preferences

- Auto changeover methods:
 - At 1°F above cool or 1°F below heat setpoint (default)(Configurable between 1°F – 4°F.)
 - Engages changeover timer (guard timer).
 - Another 1°F above cooling or 1°F below heating changeover points(C-COP/H-COP)(default), immediate changeover ignores changeover timer (Configurable between 1°F – 4°F.)
 - Changeover timer to prevent frequent mode change.
 - 0 (default), 15, 30, 45 or 60 minutes.
- Recommend leaving the default settings.**

Dealer information

- Selecting allows you to enter and review the dealer's information.
- All the information imputed can be viewed by the homeowner.

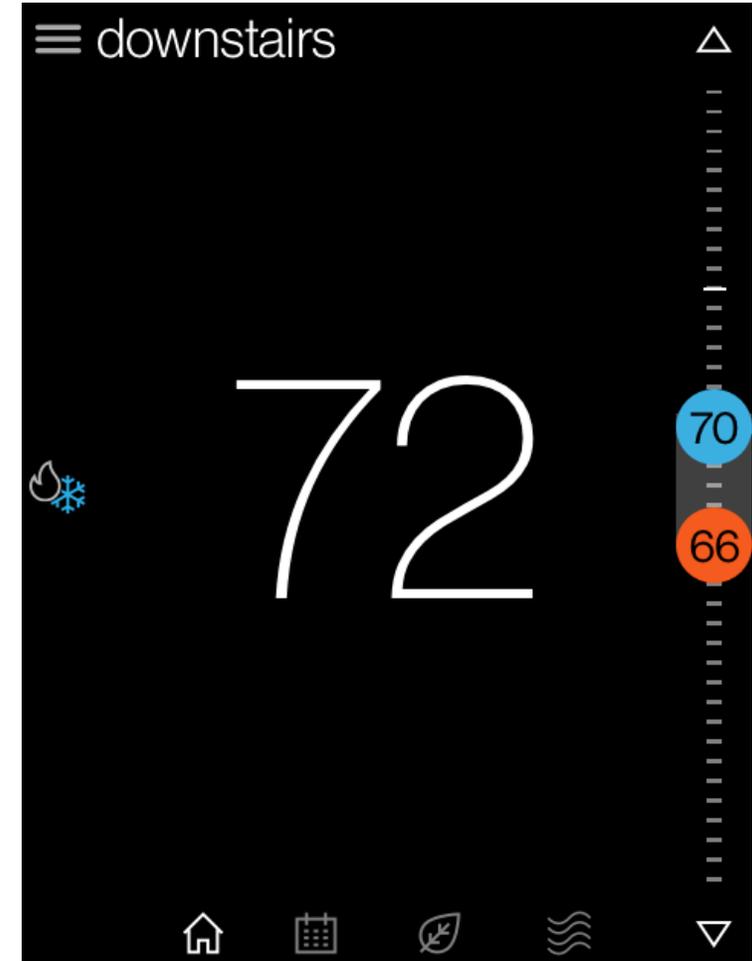

Full Set-up

Final step - Complete set-up

- Selecting complete set-up will conclude the full set-up of the thermostat and display normal mode for you to navigate and verify settings.

Reminder: All steps must be reviewed before completing full set-up.

Normal Mode

- Normal mode allows you to view messaging, temperature, and access settings to adjust parameters placed by the installer.
- Navigating is accomplished by tapping icons or turning the analog dial.
- **Note:** Analog turn dial is used to adjust **temperature only**. Pressing the dial returns to the home screen.

Adjust control

- Tapping the system mode icon allows you to select:
 - Auto. (cool & heat)
 - Cool.
 - Heat.
 - Off.
 - Emergency heat. (heat pump only)
- Tapping the arrow icons or rotating the dial will adjust setpoints that are displayed. You can also slide the setpoints to the desired temperature.

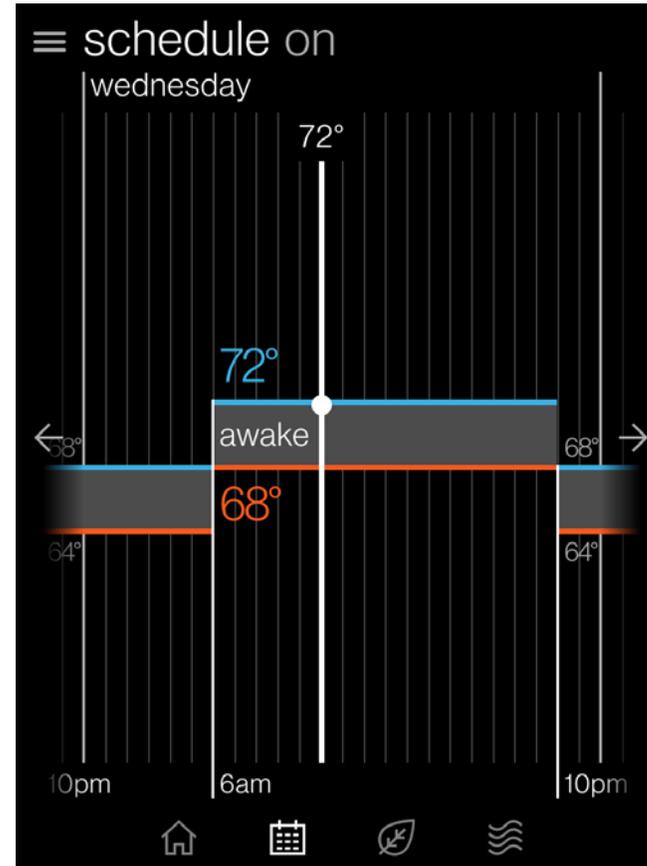

Homeowner Navigation

Schedule

- The schedule is presented as 7 days, displaying one day at a time, with 24 hours fitting on the screen.
- You can use the drop-down menu or swipe to enable schedule editing.
- Copy and paste is a feature that makes scheduling seamless.

Note: Unlike other screens, scheduling requires saving edits before exiting the mode.

Homeowner Navigation

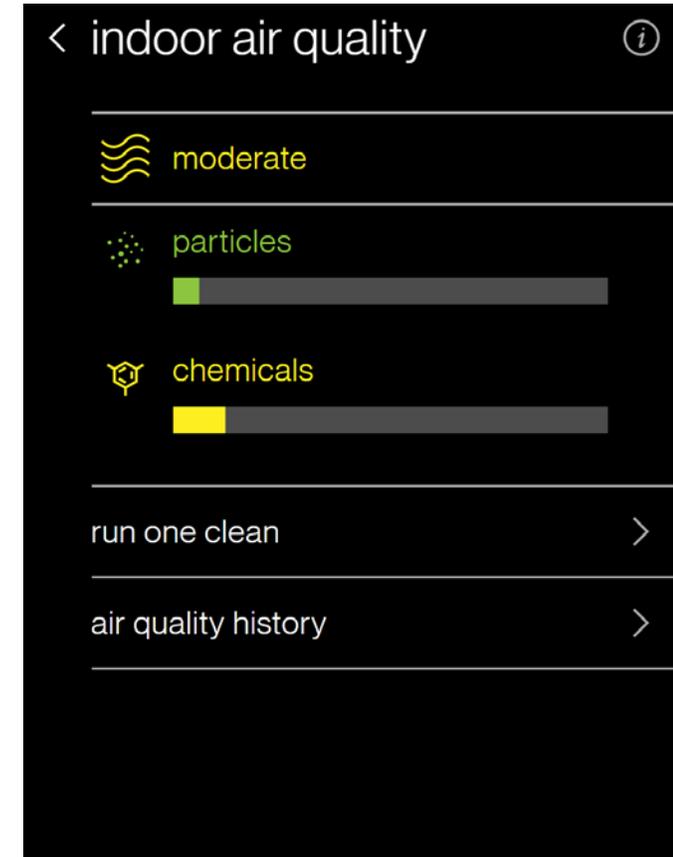

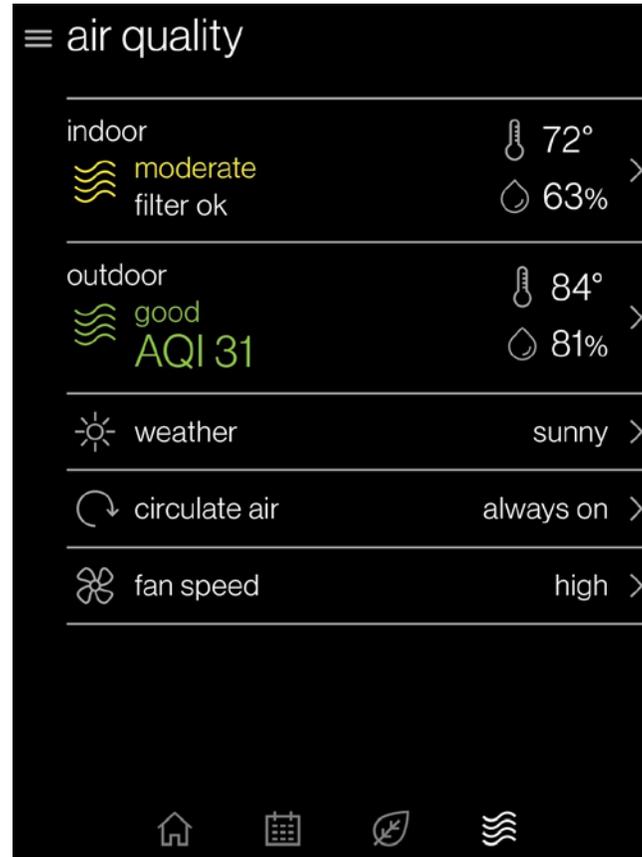

Away

- The away screen displays the current state (on/off) and the away cooling/heating setpoints used when away is on.
 - on/off is selected from drop down menu.
- User can change the values of the setpoints by dragging the numbers or the comfort range up and down.
- With the mobile application, enabling geo-fencing will automatically switch to away mode when **outside** the radius.
 - Settings must be configured in the mobile application.

Air quality

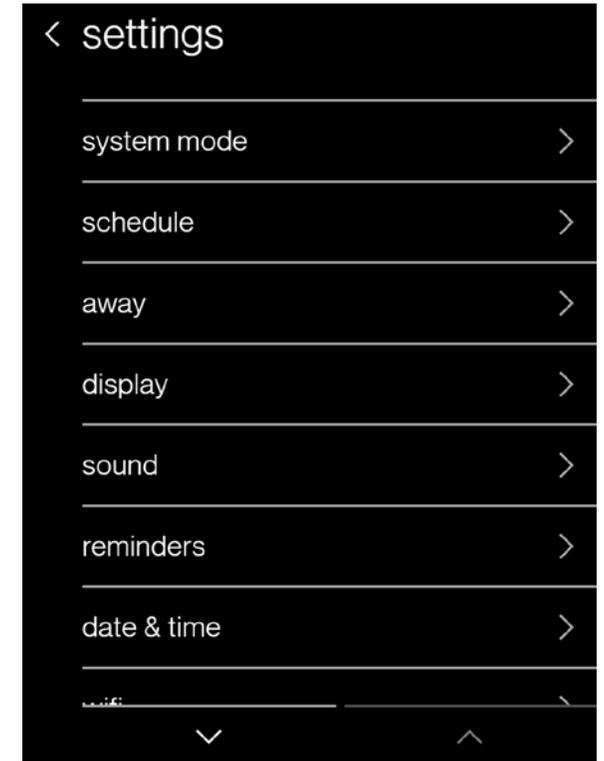

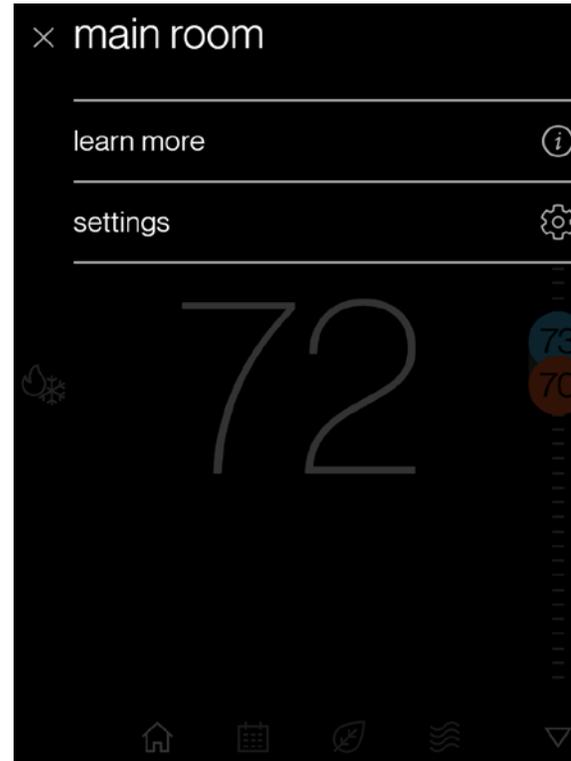

- The air quality screen displays **indoor air** quality levels, **outdoor air** quality, and **weather** (when connected to the internet and paired with the app.)
- If air quality sensors **are not** installed, indoor air quality is based on filter life cycle and humidity values.
- Selecting indoor air quality from the air quality screen allows you to access **one clean and air quality history**.
 - **One clean** runs the fan, at high speed for three hours, to circulate and filter the indoor air.

Homeowner Navigation

Settings

- Settings gives you access to additional supporting features:
 - Display.
 - Adjust and enable visual features.
 - Comfort.
 - Set target humidity.
 - Configuration.
 - App. account setup
 - Dealer information
 - Date & Time
 - Enable messages/view alerts
 - System components
 - Home Wi-Fi

Mobile Apps

Account set-up

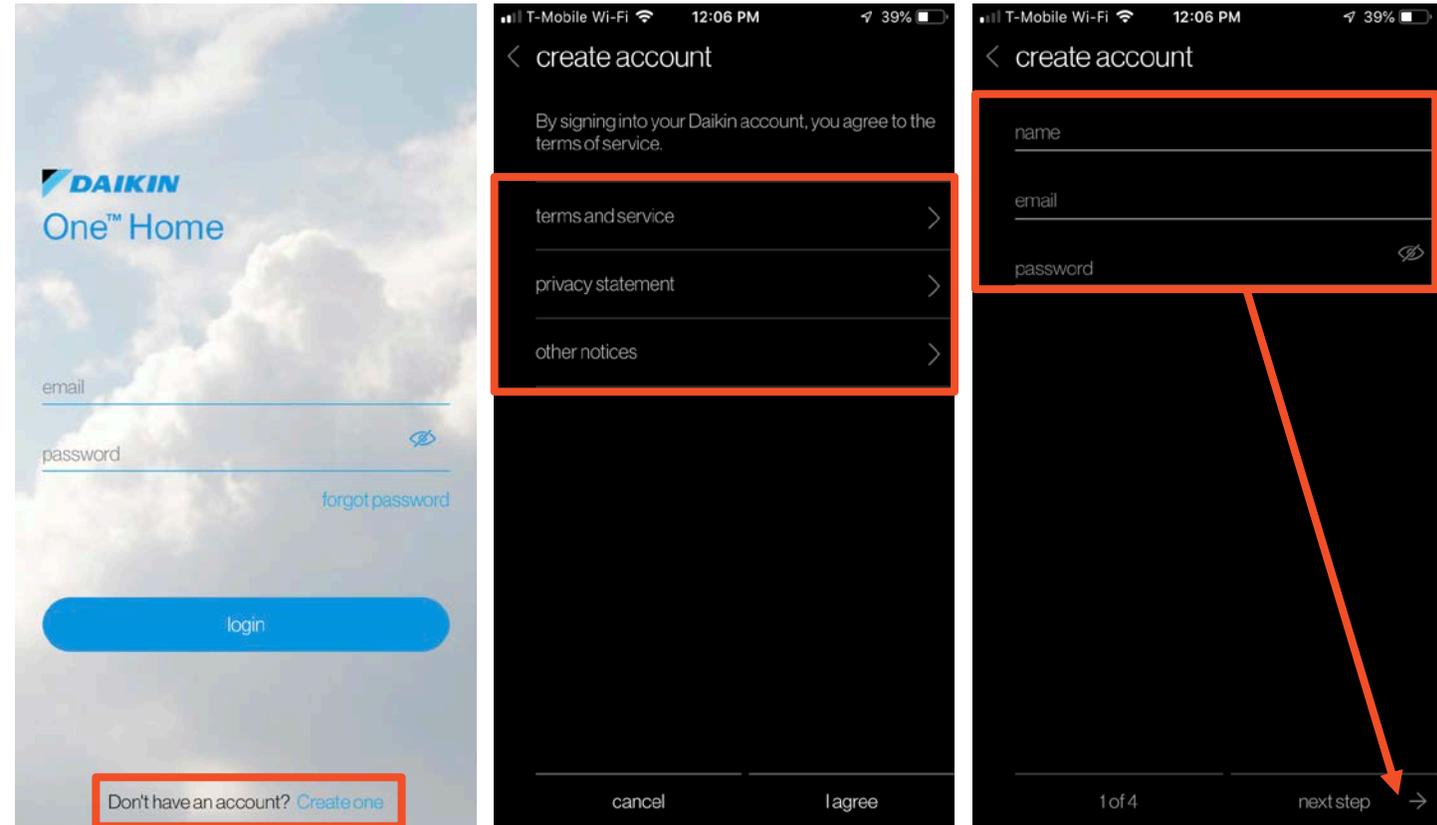

- Setting up an account is a four-step process.
 1. Downloading the application from your IOS or Android application store.
 - Creating the account.
 2. Confirming your account.
 3. Adding the thermostats' location.
 4. Connecting the app to the thermostat.

Note: A mobile device, the **Daikin One+** connected to **Wi-Fi** that is wired to an **S21 system** and a valid **email address** is needed to create a mobile account.

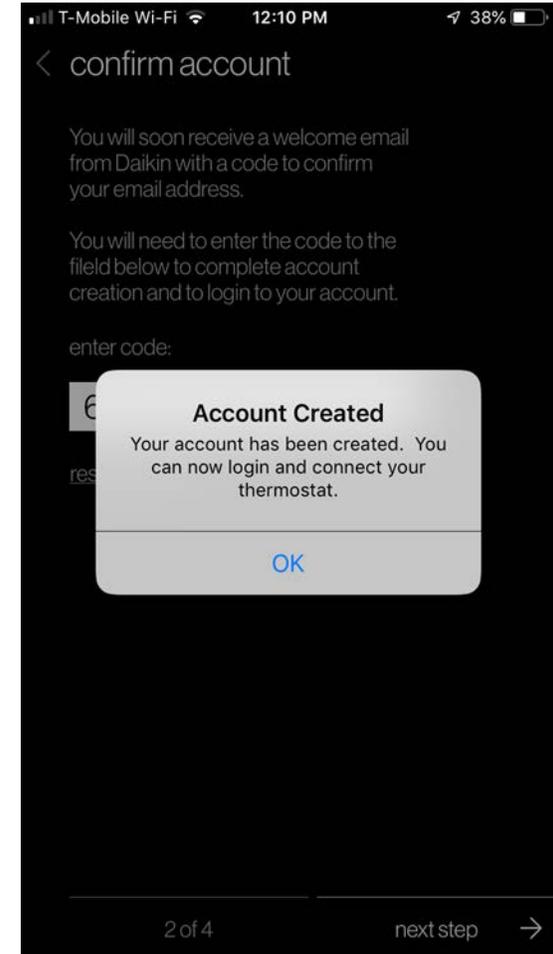

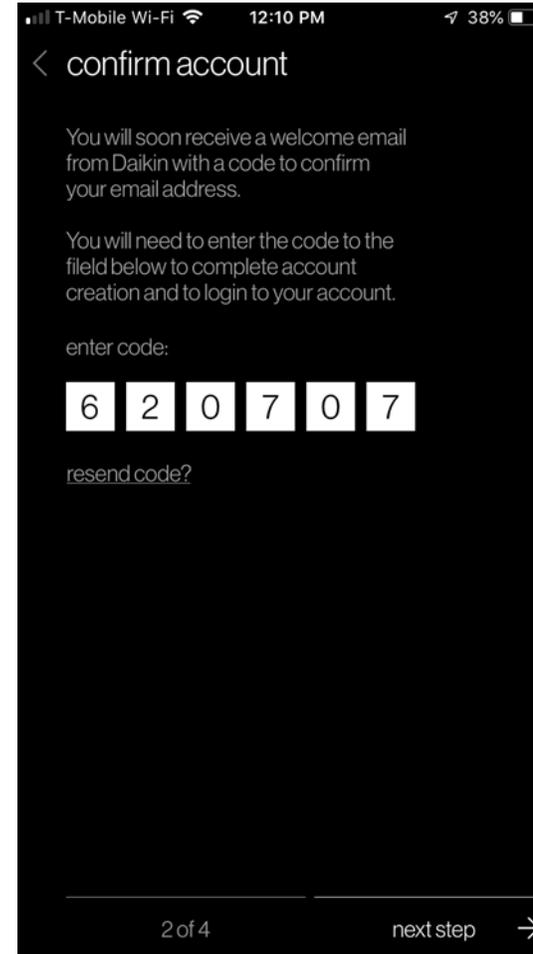

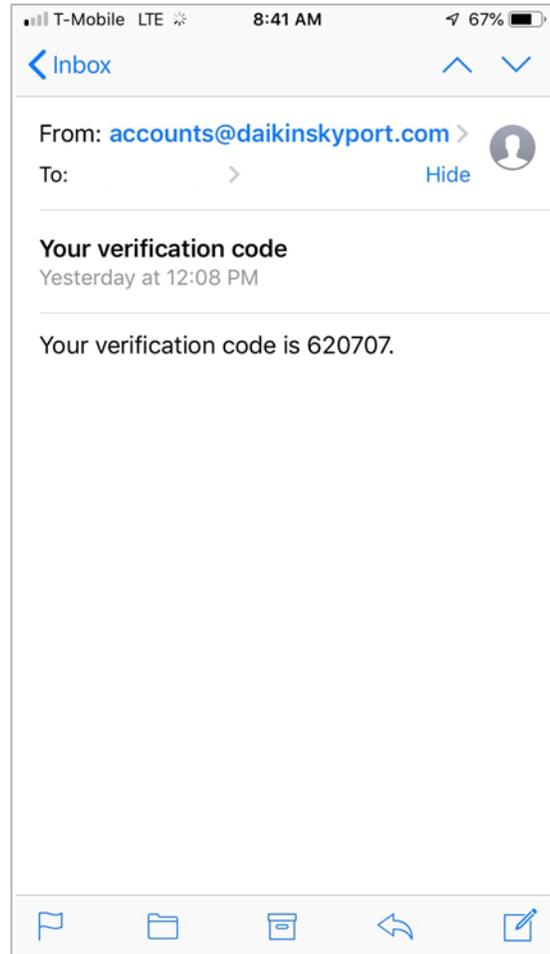

Step 1 - Create the account

- Tapping **create one** at the bottom right corner of the login screen will start the process.
- **Before** agreeing, read the terms and service, privacy statement, and other notices.
- Fill in your name, valid email address, and password.

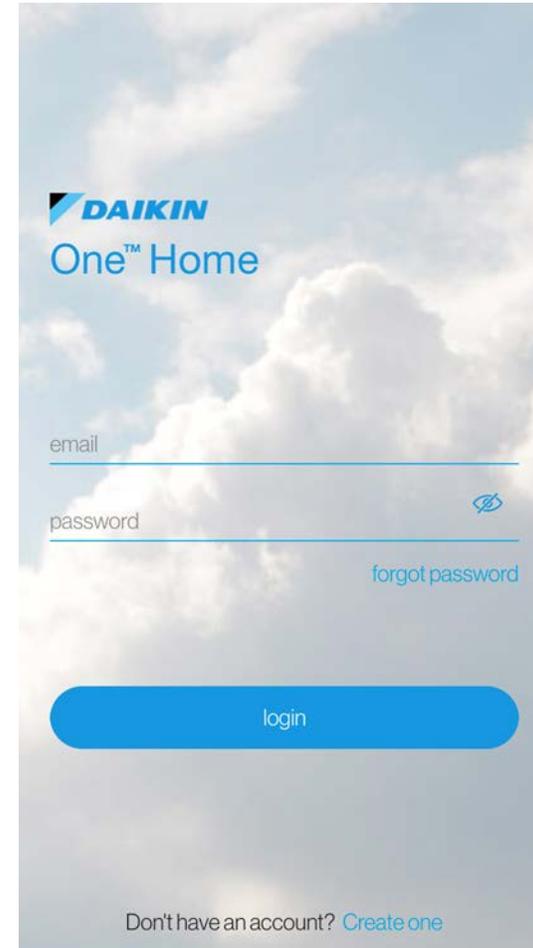

Step 2 - Confirming the account

- You will be prompted to access the **email address** you provided when creating the account.
- A welcome email will appear in your inbox providing a **six-digit** code.
- Entering the six-digit code on your phone app. will allow you to continue.

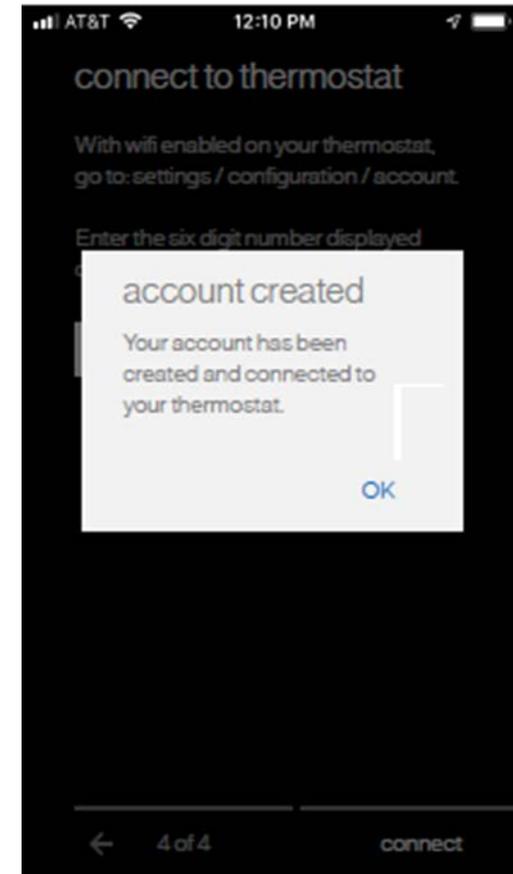

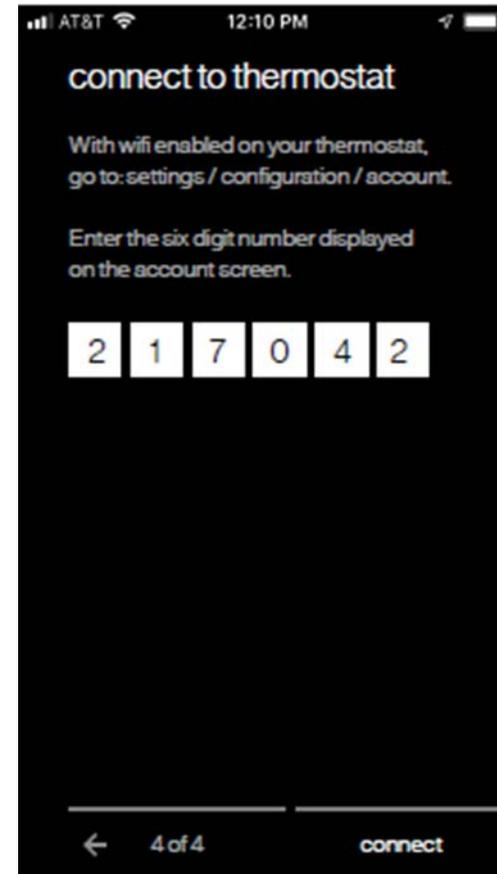

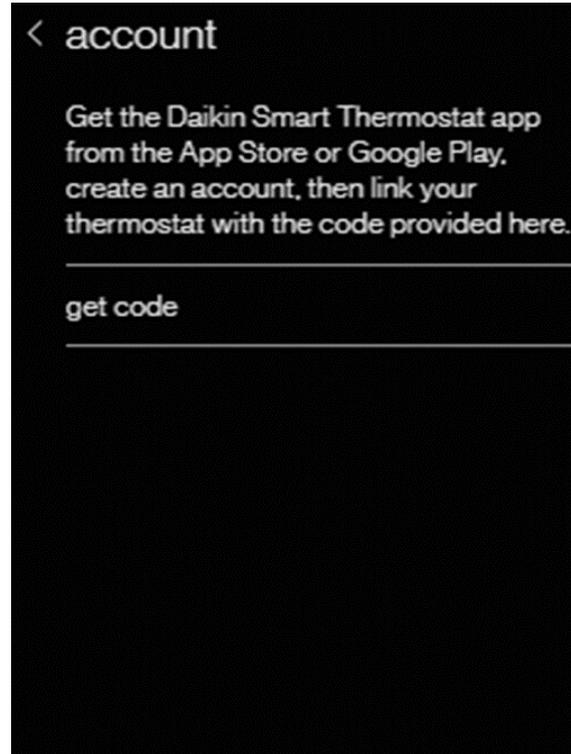

Step 3 - Adding the thermostats location

- Enter the email and password associated to your mobile account and tap the login button.
 - If you have forgotten your password, tap the forgot password link to recover information via email.
- Type the address of where the thermostat is located to gather accurate information.

Step 4 - Connecting the App to the thermostat

- With wifi enabled on your thermostat, access your account to retrieve the six-digit code.
- Type the six-digit code displayed on your thermostat into the space provided on the mobile app.
- Tap connect to continue and operate the Daikin *One+* from your mobile device.
