

DAIKIN VISTA
HEATING & COOLING
SINGLE ZONE SYSTEMS

UP TO 19.8 SEER2 / UP TO 9.4 HSPF2 / UP TO 12 EER2

R32

The air today feels just right — amazing temperature, ideal humidity, and freshness — like right after it rains. But what makes it even better is that this ideal air is happening indoors. Inside your space. Inside, where we spend most of our time — working, playing, sleeping, living.

At Daikin, we're committed to making the air inside just as refreshing as the air outside. With Daikin efficiency, quality, and control, you can create your own ideal indoor environment. So, every day feels perfect, inside, and out.

Perfecting The Air We Share.

Daikin *VISTA* Ceiling Cassette Indoor Unit Single Zone Heat Pump Systems

The Daikin *VISTA* is a remarkable blend of iconic design and engineering excellence with an elegant white finish. Fitting within the ceiling grid and discreetly mounted to the ceiling itself, Daikin *VISTA* is stylish, low profile, and compact. High efficiency and comfort is delivered through the combined use of floor and presence sensors (optional). It is also possible to close individual louvers via the wired remote control for personalized comfort.

* Complete warranty available from your local dealer or at www.daikincomfort.com. To receive 12-Year Parts Limited Warranty, online registration must be completed within 60 days of installation. The duration of warranty coverage may depend on the state in which you reside. Some states and provinces do not allow warranty coverage to be conditioned on registration. For a list of states and provinces that do not allow warranty coverage to be conditioned on registration, please visit www.daikincomfort.com/warranty-information or, to request a paper copy of this information, please call us at 1-855-502-3903. Other limitations and exclusions apply, refer to complete warranty details for full list of limitations and exclusions.

Daikin *VISTA* Ceiling Cassette

Designer Comfort

Extremely compact casing (2'x2') is designed to enable unit to fit flush into ceilings without cutting ceiling tiles and without overlapping adjacent tiles. Energy efficient operation thanks to specially developed small tube heat exchanger and optional intelligent sensors (BRYQ60AAW). The use of a higher efficiency DC fan motor reduces operational power input compared to the previous generation. Direct integration of fresh air through a factory knockout.

Efficiency and Comfort:

Seamless integration in standard architectural ceiling tiles, leaving only 5/16"

- » High efficiencies with Up to 19.8 SEER2 / Up to 9.4 HSPF2 / Up to 12 EER2.
- » Manage energy consumption thanks to specially developed small tube heat exchanger, DC fan motor, and two optional intelligent sensors.
- » Fresh air integration possible.
- » 12-Year Parts Limited Warranty*

Ideal solution for:

- » Renovations, remodeling and new construction
- » Meeting rooms, break rooms, Quick serve restaurants, medical offices etc.
- » Rooms where floor space comes at a premium or is not available for other application
- » Ceiling void or attic does not allow for a viable duct run option

The *VISTA* Ceiling Cassette fits within a 2'x 2' ceiling grid and can be installed in close proximity to other building accessories.

- » Remarkable blend of iconic design and engineering excellence with an elegant finish in white, or a combination of silver and white
- » No optional adaptor needed for DIII-connection, link your unit into the wider building management system.

Innovative technology:

Outdoor Unit Features:

Anti-Corrosion Treatment on Heat Exchanger

Quick Warming Function – Preheats the compressor to limit the time required to discharge warm air.

Automatic Defrosting – Sensor performs automatic defrosting of the outdoor heat exchanger if necessary, ensuring optimum heating performance.

Outdoor Unit Quiet Operation – Outdoor unit sound levels can be reduced by 3dB for times when quieter operation is needed.

Indoor Unit Features:

Draft Reduction – This system directs warm air to the floor in winter and cool air across the room in summer for optimal efficiency and comfort. The large flap governs airflow direction while the small flap (or diffuser) swings, producing fine air currents that help circulate the air around the room.

Individual Louver Control – The new louver changes the delivery angle to horizontal for cooling and vertical for heating operation, to keep cold or warm air from blowing directly onto your body.

Included in the optional sensor kit:

Presence and Floor Sensor (optional part #BRYQ60AAW) –

The presence and floor sensors are infrared sensors with the ability to sense movement in the room. When you are in the room, the system operates normally. If you leave the room for more than 20 minutes the system automatically changes to an energy-saving operation. The floor sensor detects the average floor temperature and is designed to ensure even temperature distribution between ceiling and floor.

Knowledge is power

The new minimum efficiency standards are based upon new metrics (SEER2/EER2/HSPF2) derived from a new test procedure (M1) rather than the historical metrics (SEER/EER/HSPF) from the old test procedure (M). Testing procedures and requirements for developing efficiency ratings will now be more stringent with the new 2023 DOE regulations. The prior M testing procedure is being replaced by the M1 testing procedure for 2023 compliance.

Up to	
19.8 SEER2	12 EER2
9.4 HSPF2	1.8 at 5°F
(Coefficient of Performance)	

Single Zone Heat Pump
Efficiency Ratings

Why is Coefficient Of Performance (COP) Important?

The COP of a heat pump is the ratio of:

$$\text{COP} = \frac{\text{energy out}}{\text{energy in}}$$

When the COP is >1, the result is a system providing more heating energy than energy consumed. As the COP increases, the higher the efficiency — resulting in low utility costs. This rating is important when considering the efficiencies of oil and gas furnaces.

Take comfort in your decision.

R-32 INDOOR AND OUTDOOR UNITS

Comfort without compromise:

The Daikin *VISTA* system is an Inverter unit that runs continuously but adjusts the compressor's speed to meet the demand. An inverter is energy efficient technology that is designed to eliminate wasted operation in air conditioners by efficiently controlling motor speed. Because it maintains the temperature consistently, your space will no longer feel too hot or too cold.

The right choice to replace R-410A.

Proven. Easy. Available. Efficient.

Step into the future of home comfort with Daikin's line of residential products. As a global leader in air conditioning, Daikin is committed to innovation that supports your home comfort with the use of low global warming potential (GWP) R-32 refrigerant. Our new R-32 products have been designed to meet efficiency, reliability, and comfort needs, while helping reduce impact on the environment with a lower GWP refrigerant compared to R-410A.

- » **Innovation:** With R-32's lower global warming potential (compared to previous R-410A) you can reduce your impact on the environment while enjoying outstanding cooling and heating at home.
- » **Efficiency:** Daikin's use of R-32 refrigerant and our game-changing inverter technology is designed to provide energy efficiency for low utility bills and energy consumption.
- » **Durability:** Daikin's legacy of over 100 years ensures each product is built to last, delivering reliable performance and comfort year after year.
- » **Intelligent:** Many Daikin systems integrate with smart home technologies, making it easy to control

and optimize your home's climate. Additionally, for homeowners who want to step their indoor comfort up even more, ask about the Daikin systems that connect to the Daikin *ONE* thermostats, *SkyportCare*, and how to address other indoor air quality concerns.

- » **Peace of Mind:** Confident in our quality, Daikin offers robust limited warranties*, ensuring your investment brings long-term comfort and peace of mind.

Aligning with Goals of:

- » **Lower GWP refrigerant — reduce impact at the source:** Utilizing a refrigerant with lower Global Warming Potential (GWP) compared to conventional refrigerants, like R-410A.
- » **Sustainability:** Easy to top off, or clean and reuse on-site and easy to reclaim and recycle.

* Complete warranty details are available from your local dealer/contractor or at www.daikincomfort.com

CONTROLS

From anywhere in the world. Or your living room.

It can happen to anyone. You forgot to change the temperature of your heat pump system or air conditioner before leaving the house, or you will be delayed returning home and wish to avoid needlessly heating or cooling your home. What in the past would have resulted in wasted energy is no longer a problem. With the *SkyportHome* App*, you are always in control. You can use your tablet or smart-phone to access your Daikin system via the internet.

SkyportHome

ONE+ or *ONE* touch thermostat is required to be able to have the *SkyportHome* app*

Daikin *ONE+* Smart Thermostat

The Daikin *ONE+* smart thermostat is available for single and multi-zone indoor unit models.

With the new translation adaptor, connecting the Daikin *ONE+* smart thermostat provides several user features including remote monitoring, control and geofencing using the *SkyportHome* app, Google, and Amazon voice assistants.

Daikin *ONE* Touch Smart Thermostat

A great control option for Daikin single and multi-zone systems. With customizable settings and the power to wirelessly control the system from anywhere, homeowners may never want

to change their thermostat manually again. However, the touchscreen interface supports a user-friendly experience when they do. Voice control is also possible with compatible Amazon and Google devices. The Daikin *ONE* touch smart thermostat is also compatible with the *SkyportHome* app.

Daikin wired remote controller

Built on a solid foundation the *Navigation* Remote Controller has been enhanced to meet the configuration requirements of Daikin's R32 indoor units.

- » Sophisticated schedule function that is adaptable both commercial and residential use.
- » Advanced function such as setback, set-point range limitation
- » Auto changeover between Heating and cooling mode with dual set-points
